

GKR: GALILEO Knowledge Repository

*Marlee Givens
Andy Carter
Debra Skinner*

*GaCOMO Conference
Macon, GA
October 4, 2012*

About us

- Marlee Givens
 - GKR project manager
- Andy Carter
 - Digital Projects Archivist, Digital Library of Georgia
 - GKR Content & Metadata Committee chair
- Debra Skinner
 - Coordinator of Cataloging & Metadata, Assistant Dept. Head, Georgia Southern University
 - GKR Content & Metadata Committee member

The Problem

- Much of USG's intellectual product never appears in a permanent printed form
- Exists as disorganized pockets of digitally born objects & media scattered among individual hard drives, departmental servers, and removable storage media across an institution
- While USG's digital scholarly output reflects substantial investment of resources, assets and effort, it
 - Lacks curatorial stewardship;
 - May be inaccessible;
 - Exists on unsustainable hardware, software, or individual support;
 - Needs future-proofing migration strategies.

GALILEO Knowledge Repository (GKR)

- Building a system-wide approach to Institutional Repositories
- Concept developed by Regents Advisory Committee on Libraries (RACL) in August 2004
- Federal grant (IMLS National Leadership) awarded 2009 to seed the project
- Leads: Georgia Institute of Technology & University of Georgia

GKR partners

GKR Project Components

- 4 new institutional repositories (IRs)
- Central metadata repository
- IR-related services: digitization, content submission, rights assistance, preservation
- USG statewide faculty survey
- Symposium and workshop
- Documentation of technical model

GKR metadata repository

- <http://gaknowledge.org/>
- Content from USG repositories available from a central site, organized by academic discipline
- DSpace repository with content harvested via OAI-PMH and the GKR Mapping Tool
- Keyword/full-text search
- Browse by title, author, date

The Impact of Teacher Absenteeism on Student Performance

The Case of the Cobb County School District

This analysis was conducted in the Cobb County School District, a large suburban school district with a total number of 114 schools, more than 6,800 classroom teachers, and more than 106,000 students. Data was collected on 453 third-grade teachers and 7683 third-grade students from 64 elementary schools. The results of the analysis support previous research findings that higher teacher absenteeism leads to lower student math scores on standardized tests. This study also found that students attending low-socioeconomic area schools scored significantly lower on the reading and math sections of the Criterion Reference Competency Test (CRCT).

Ram Scholar Repository

Welcome to Albany State University's Digital Resources. This is a digital service that collects, preserves, and distributes scholarly output of the university. Repositories are important tools for preserving an organization's legacy; they facilitate digital preservation and scholarly communications. The repository facilitates open access scholarly communications while preserving the scholarly legacy of Albany State University faculty, staff and students. The repository contains many types of content, including electronic theses, dissertations, yearbooks, faculty paper, faculty publications and books, technical reports, conference proceedings, and digitized maps.

WELCOME TO THE GEORGIA HEALTH SCIENCES UNIVERSITY DIGITAL REPOSITORY

Scholarly Commons is the institutional repository for the Georgia Health Sciences University. It was developed to deposit digital collections, share and distribute scholarly communication and historical works. The repository can include journal articles, conference papers, theses and dissertations, technical reports, and other digital items.

Copyright Assistance Form

[View](#) [Edit](#) [Webform](#) [Outline](#) [Results](#) [Track](#)

The GALILEO Knowledge Repository (GKR) rights assistance service helps GKR partner institutions to clarify rights issues, like copyright, authors' rights and permissions. Please use this form to request assistance from GKR staff.

Please note that no one on the GKR staff is an attorney, and that this service does not provide legal advice. If you are unclear about your options when confronted with a specific legal issue related to copyright, you are urged to consult with an attorney with a background in copyright law.

Statewide faculty survey

- Spring 2012, led by Dr. Jennifer Campbell-Meier, UA SLIS
- Population: all faculty at 35 USG institutions
- 539 respondents, from 26 USG institutions, completed the survey
- Research questions
 - To what extent do faculty in the USG publish in open access journals or repositories?
 - To what extent are faculty aware of the individual rights of authors?
 - Who is publishing in open access journals and repositories?
 - To what extent are faculty interested in developing pilot collections?
 - To what extent are the administrators familiar with the open access movement?
 - What campus needs can the repository meet?

Symposium and workshop

- Cooperative Curation, August 8-9
 - Free registration
 - 104 registered, 89 attended
 - Travel scholarships
 - Guide to Statewide and Consortial Repositories
 - August 8: Symposium
 - Consortial repository case studies
 - Future trends panel
 - August 9: Workshop
 - Management and Technology tracks

EagleScholar at Georgia Southern University >

The [Zach S. Henderson Library](#) at [Georgia Southern University](#) has created EagleScholar, an open-access digital archive for the scholarly output of the Georgia Southern community. Its mission is to preserve and make more widely available to the international scholarly community the intellectual output of the Georgia Southern University's faculty, staff, and students. It also serves as an archive of historical and other materials that broadly support the University's academic mission.

 - Content & Metadata Committee
 - Steering Committee
- Asked for input every step of the way
 - Dublin Core
 - Item types
- Content & Metadata Committee - Online meetings
 - Evaluated digitization submissions
 - Tested our sites & provided feedback

Partner Sites Workload

- No additional staffing
- Developed workflow involving multiple library staff
 - Liaisons – Encouraged use of IR with faculty
 - Content Management - Reviewed submissions & checked/advised regarding copyright
 - Cataloging/Metadata Staff – Entered metadata
- Promotion
 - PowerPoint presentation, FAQs, presentation to Library Committee & others, liaison promotion

Frequently Asked Questions

The screenshot shows the Georgia Southern University EagleScholar Repository website. The header includes the university logo and name, a search bar, and a navigation menu with links like 'My.GeorgiaSouthern', 'Online Programs', 'Give to Georgia Southern', 'Directory', 'Newsroom', 'Majors', 'Calendar', 'Human Resources', and 'University Store'. A left sidebar contains links for 'University Homepage', 'For FACULTY and STAFF', 'For STUDENTS', 'For ALUMNI and COMMUNITY USERS', 'About Us', 'Ask / Contact Us', 'FAQs', 'Support the Library', 'Get the GALILEO Password', 'Hours', and 'Return to LIBRARY'. The main content area is titled 'EagleScholar Repository' and features a 'Quick Links' section with a 'BOOKMARK' icon. Below this, there are two FAQ sections. The first section, '1. How do I know whether the materials I would like to contribute to EagleScholar have copyright clearance or not?', explains that most publishers retain copyright and provides information on negotiating author rights using the Scholar's Copyright Addendum Engine at scholars.sciencecommons.org/. It also mentions contacting Jonathan Harwell at jharwell@georgiasouthern.edu for help. The second section, '2. What is EagleScholar and how can I contribute?', describes the repository as a free online archive of articles, presentations, and other scholarly works from Georgia Southern University, containing electronic dissertations and other scholarly output. It notes that the repository is primarily targeting gray literature and that publications available freely online and indexed in Google are more likely to be read and cited. A right sidebar contains a 'Search FAQs' box and a list of 'FAQ Collections' including links to 'All', 'Accessibility (ADA)', 'Adaptive Technology', 'Basic FAQs', 'Community Users', 'Computers and software', 'Confidentiality of Library Records', 'Distance Learning', 'Doing Research', 'EagleScholar Repository', 'East Georgia College Students', 'Faculty Resources', 'GALILEO', 'Graduate Students', 'ILiad - Interlibrary Loan', 'Library Catalog', and 'Student Rooms Reservations'.

EagleScholar Repository

BOOKMARK

1. How do I know whether the materials I would like to contribute to EagleScholar have copyright clearance or not?

Most publishers retain the copyright for your articles, unless you negotiate for the right as an author to publish them in the institutional repository ([EagleScholar](#)). Some publishers allow us to post your pre-print or post-print versions; policies vary, and many are listed in the SHERPA/RoMEO database at www.sherpa.ac.uk/romeo/.

You can negotiate for author rights for your upcoming publications, with the Scholar's Copyright Addendum Engine at scholars.sciencecommons.org/.

We will be happy to help you determine the copyright status of your publications. Simply contact Jonathan Harwell at jharwell@georgiasouthern.edu and provide the information about each publication you'd like to publish in [EagleScholar](#). Keep in mind that many of your previous publications, while they *might* be allowable in pre- or post-print versions, are *probably* not allowable in their final published versions (due to copyright restrictions), but we're very happy to check.

2. What is EagleScholar and how can I contribute?

The [EagleScholar](#) institutional repository, launched in Fall 2010, is a free online archive of articles, presentations, and other scholarly works from Georgia Southern University. It contains the electronic dissertations written by Georgia Southern students and will eventually contain as much of the scholarly output of the institution as copyright restrictions permit.

For [EagleScholar](#), we are primarily targeting gray literature that is even more difficult to access than journal articles -- even for people within academia. Conference presentations, working papers, dissertations, teaching tools, images, recordings, etc., can be preserved in [EagleScholar](#), with open access for the public.

Publications that are available freely online and indexed in Google (as [EagleScholar](#) is) are more likely to be read and cited. If you have materials to contribute, please contact Jonathan Harwell (jharwell@georgiasouthern.edu).

Benefits to Partner Sites

- Consortium level decision making & grant funding resulting in better product than a single institution
- Technical development such as mapping function
- Opportunity to participate & have input at ground level
- Local materials digitized
- Valdosta interns for creating metadata
- Training & problem solving

Success of Local IR

- Successful implementation
 - Much of content was from library initiative rather than faculty
 - Looked through institution web site & asked permission to add
 - Followed up announcements of conferences, papers with request to add to IR
 - Good success with conferences & dissertations/theses
- Not all grey literature getting captured
- IR or Special Collections

Ideas for the Future

- Faculty required to archive some types of research/publications
- Promote GKR & access to resources of other institutions
- What do faculty want?
 - Showcase their publications whether full-text included in IR or not

Athenaeum Author Deposit Agreement

I hereby grant to the University of Georgia (UGA) the non-exclusive right to store, reproduce, display, and distribute the deposited work (Work) in the Athenaeum electronically to the open Internet without fee. This non-exclusive license does not constitute a transfer of copyright to UGA.

UGA may make and retain copies of the Work in its original format and migrate to new electronic formats as appropriate for the purposes of preservation, access, and security. UGA may not alter the content of the work.

I represent and warrant the following:

I own copyright to the work, and have full authority to enter into this agreement.

If the submission contains material for which you do not hold copyright, you represent that your use of the work falls within the fair use provisions as described in U.S. Copyright Law (Title 17 United States Code Section 107) or have obtained the unrestricted permission of the copyright owner to grant UGA the rights required by this license, and that such third-party owned material is clearly identified and acknowledged within the text or content of the submission.

The work is original and does not infringe upon the rights of others, does not contain any libelous content, and does not invade any privacy or confidentiality of third parties.

In the case of third-party interest in the work, I have obtained written permission to make further use of the work.

I have read and agree to the terms of this agreement.

Outreach to Faculty

- Sent letter from University Librarian to authors whose work we harvested
- Developing Scholarly Communications presence on library website
- Finding “Champions”
- BioMed Central
- Open Access Week

Outreach to Faculty: Mass mailing

Dear Dr. Fletcher:

I am pleased to inform you that your article, “Competitiveness of peanuts: United States versus China,” has been added to the University of Georgia's scholarly repository, *Athenaeum@UGA*. The work is available at: <http://hdl.handle.net/10724/12047>.

The purpose of *Athenaeum@UGA* is to increase the visibility and use of scholarly and creative works by University of Georgia researchers. *Athenaeum@UGA* seeks the broadest possible readership for your scholarship by providing a readily accessible permanent home for your work on the Web.

[Advanced Search](#)

The Linguistic Atlas Project (LAP) consists of a set of survey research projects about the words and pronunciation of everyday American English, the largest project of its kind in the country. Beginning in 1929 interviews with thousands of native speakers have been carried out in different regions of the country--and primary interviews are still going on in the Western States.

Automated Article-Deposit

With repositories now rapidly gaining pace, many organizations find populating their repositories a challenge, particularly as researchers are required to duplicate efforts to upload files into a repository.

BioMed Central can reduce this burden by automatically populating repositories via the SWORD (Simple Web-service Offering Repository Deposit) protocol. This transfers complete article content (including PDFs, additional files and article metadata) from one repository to another. Please contact your [Sales Representative](#) for more information.

Benefits of Automated Article-Deposit

- **Time-saving:** Automated deposit into the repository requires less time and effort from both authors and repository administrators.
- **Policy/mandate compliance:** The service enables automatic compliance with the increasing number of open access deposit and self-archiving mandates from institutions and funding bodies.
- **Repository population:** Adding content to a repository can be a major challenge for institutions. Automated Article-Deposit makes repository population easy and ongoing.

[Data Changes](#)

The UGA FAR is an online tool that allows faculty members to track their academic accomplishments, including past, recently submitted, and current work. Combining automatically loaded data (contact information, yearly appointments, education, contracts and grants data, etc.) with faculty-entered information, it provides a central resource of data about UGA faculty and their activities that can be used for multiple purposes, including:

- Facilitating collaboration and knowledge sharing among faculty
- Facilitating communication with external audiences about the activities of UGA faculty
- Supporting credentialing needs for regional and specialized accreditations
- Reporting for annual evaluations, annual reports for departments, schools/colleges, regional and specialized accreditations, and other management needs of UGA units

WHAT'S NEXT FOR THE GKR?

Plans for grant extension

- Continue grant services
 - Digitization
 - Content submission
 - Preservation
 - Rights assistance
- Faculty outreach
 - On-site workshops
 - Develop focus group materials
- Transfer DSpace hosting service to vendor
- Expand metadata repository to new partners

What questions do you have?

Thank you!
